RESEARCH ENGAGEMENT

Halifax Hall, Sheffield University Campus

Exploring the research landscape and
identifying research delivery opportunities
within the NHS

The Cure Parkinson's Trust in collaboration with the Parkinson's Academy is hosting a meeting dedicated to Research Engagement and Involvement.

Research Engagement will identify ways to become involved in Parkinson's clinical research. The meeting, chaired by Dr Camille Carroll, Professor Oliver Bandmann, and Dr Peter Fletcher will cover a range of topics from research idea to successful study closure... and everything in between to becoming a Principal Investigator and whether disease modification in Parkinson's could be a reality.

The meeting will cost £70, but you may be able to apply for funding to cover travel and attendance costs.
