

The impact of Covid-19 and how objective measurement and the PKG® can benefit your patients and support clinical care.

WEBINAR

Date Tues 13th July

Time 4pm BST

Please join our guest speakers for this online webinar to discuss how objective measurement and the PKG can aid the management of your Parkinson's disease patients.

SPEAKERS

PROFESSOR PER ODIN

Professor of Neurology Bremerhaven & Lund University

‘Validity of patient diaries, electronic diaries and monitoring of non-motor symptoms?’

PROFESSOR RAY CHAUDHURI

Professor of Neurology/Movement Disorders at Kings College Hospital, London

‘Wearable Sensors & Smartphone technology – Do they really help in clinical practice?’

The impact from Covid-19:

2020 was a challenging year and 2021 continues to be similar, it has created new opportunities to manage patients in a different way, and this is now a reality for many healthcare services and their Parkinson's patients. The impact of the Covid-19 pandemic has affected everyone, hospitals and clinics have been forced to make changes to the way they manage their patients and some Parkinson's services have adopted

technology to support this new way of working.

- Restrictions to hospital visits
- Disruptions to patient appointments including cancellations
- Risk to health and safety of clinic staff & patients
- Reluctance of patients to attend hospital appointments

Don't miss this great opportunity!
